Mary,

This website is about all we have for guidance.

<https://www.epa.gov/superfund/statetribal-correspondence-concerning-npl-site-listing>

It does provide copies of letters that were sent for other sites. The last one this Region did was for Blades GW in Delaware. The last PA letter that we did was for [REDACTED] back in 2013. Copies of those letters are attached.

Lorie

Lorie—I assume there is/are guidance(s) or policy(ies) on how the proposal/listing process should be handled, including formats or guidelines for letters to the governors. If so, can you please forward to me or point me to the relevant website. I have no experience with listing. Thanks as always.

Subject: UPDATE [REDACTED] NPL Status

Good news! The Administrator is being briefed on June 2, and assuming approval, the NPL update is tentatively scheduled for Sept. 3. I will start drafting a request for concurrence letter to the PADEP Secretary

and will provide it to Mary Rugala for review. It cannot be signed by the RA and sent out until after the Administrator approval. More info below:

Subject: Status of NPL Rules

The NPL proposed and final rules formerly known as the Spring 2020 rules are now tentatively projected to be published in early September. To avoid further confusion regarding the name/date of the rules, I am reverting back to the numbering system (which GDIT has continued to use in their status tracking chart) and referring to this set of rules as "NPL Update #72".

The Administrator is now scheduled to be briefed on the sites on June 2. Regions must wait to formally request written state concurrence until after we get approval from the Administrator to move forward. Assuming we receive approval from the Administrator in early June, we are projecting an FR publication date of September 3. I have attached a revised rule schedule.

We do not, at this time, have any information on NPL Update #73 which would include sites from the February NPL Listing Panel.

I will keep you updated as I receive any new information.

Thanks.
Terry
